COURSES

- Embedded system with Arduino, AVR and IOT, IIT Hyderabad
- Machine Learning, Coursera
- The Complete 2020 Web Development Bootcamp, Udemy

PERSONAL INTERESTS

- Data Structures and Algorithms
- Artificial Intelligence + Data Science
- Object Oriented Programming
- Operating Systems
- Database Management System
- Competitive Programming
- Open Source Enthusiast

SKILLS

C • C++
Python • Java
Javascript • TypeScript
Go • Linux
Data Science • Machine Learning
NLP • Computer Vision
HTML • CSS
Node.js • jQuery
Express.js • REST API
SQL • MongoDB
React.js • Git

EXPERIENCE

NOVOPAY SOLUTIONS | SOFTWARE DEVELOPMENT INTERN

Nov 2020 - May 2021 | Bangalore, Karnataka

- Worked to build a Credit Rating Engine from the scratch for the customers who have taken loan, revived a AI/ML Workbench that has been closed 3 years back, supported the data team for crunching and analysis purpose, added features in Oxygen4India website, and worked on Invoices OCR Detection Model.

GIRLSRIPT SUMMER OF CODE | OPEN SOURCE CONTRIBUTOR

Feb 2021 - Present | Remote

- Selected as an Open Source Enthusiast in GirlScript Foundation, contributed to different projects under guidance of experienced mentors.

INDIAN INSTITUTE OF INFORMATION TECHNOLOGY, ALLAHABAD | SOFTWARE DEVELOPMENT INTERN

April 2019 - Aug 2019 | Prayagraj, UP

- Utilized source code control for tracking configurations and changes to convert a dusk image to dawn image and vice versa, using the concept of pix2pix(Predict pixels to pixels), based on the structure of Conditional Generative Adversarial Network and training the designed network using PyTorch and processing in real-time.

PROJECTS

SENTIMENT-ANALYSIS-OF-COVID-19-TWEETS |

May 2020 - July 2020

Selected as a Software Trainee in IBM Hack, where I made a twitter sentiment analysis model to understand the people's sentiment towards this epidemic of Covid-19 and on the government decision to extend the lockdown.

FACE RECOGNITION BASED E-ATTENDANCE SYSTEM |

Jan 2020 - March 2020

Worked in team of 3, to create a YoloV3 based Darknet53 model to recognize the faces of the students sitting in the classroom and used MYSQL for data maintenance.

FIDUCIAL LOCALIZATION FOR PRE-OPERATIVE PLANNING IN NEUROSURGERY |

Feb 2020 - April 2020

Participated in SIH 2020 under the organization of Department of Atomic Energy, with the project Fiducial Localization for Pre-Operative Planning in Neuro-Surgery where our methodology proposes for automatic fiducial detection using ImageAI model, finding the center of detected fiducials and finally mapping the obtained centers with their 3D coordinates with respect to Image Coordinate System.

ACTIVITIES

- 2019 Rating of 1754 on Codechef, and 1572 on Leetcode
- 2020 Qualified 2nd round of Facebook Hacker Cup, and Google Code Jam
- 2020 Achieved global rank of 3090 in Google Kick Start
- 2017 Core Member of IIIT Pune Robotics Team
- 2018 Head of Table Tennis Team Of IIIT Pune
- 2019 Organised various Cultural and Technical events at IIIT Pune
