

Ashutosh Kumar Verma

ashutosh99october@gmail.com | +91-7905935519

Senior Member of Technical Staff with 5 years of experience building scalable distributed systems, AI Agents, RAG pipelines, MCP servers, and LLM-powered applications, and delivering features used by millions of users.

EDUCATION

INDIAN INSTITUTE OF INFORMATION TECHNOLOGY, PUNE

BE in ECE | Current CGPA: 8.5
May'17 - July'21 | Pune, Maharashtra

BOYS' HIGH SCHOOL AND COLLEGE

ISC | SSC | Percentage: 92
ICSE | HSC | Percentage: 93
April 2017 | Prayagraj, UP

SKILLS

AI/ML: LLMs, AI Agents, RAG, MCP, NLP, GANs, PyTorch, TensorFlow, LangChain
Languages: C++, Python, JavaScript, Java, MERN stack, REST APIs
Cloud: AWS, Azure
Tools: Linux, Git, Docker, Jenkins
Databases: SQL, MongoDB, ChromaDB

CERTIFICATIONS

- Generative AI, Adobe
- Machine Learning, Coursera
- The Complete 2020 Web Development Bootcamp, Udemy
- AWS Certified Cloud Practitioner

PERSONAL INTERESTS

- Competitive Programming
- Data Structures
- Open Source Enthusiast
- Artificial Intelligence

ACHIEVEMENTS

- Rated CodeChef 1754, LeetCode 1572
- Qualified 2nd round of Facebook Hacker Cup, and Google Code Jam
- Achieved global rank of 3090 in Google Kick Start
- Head of IIIT Pune Robotics Team
- Head of IIIT Pune TT Team

EXPERIENCE

ADOBE | SENIOR MEMBER OF TECHNICAL STAFF | HYBRID | JUL'22-PRESENT

- Led development of **Agentic AI Assistant** for Illustrator, integrating LLMs, MCP tools, AvA Harness and UXP components using FastAPI, to orchestrate multi-step complex canvas workflows.
- Designed and deployed **MCP server** to automate component version updates across 100+ components integrating Codex, Artifactory, Git, and Slack, reducing manual effort by 25%.
- Worked on **ML-based color recommendation model** using feature engineering, hyperparameter tuning, improving Precision@5 by 15% and increasing color palette adoption by 9%.
- Implemented LangChain-based **RAG pipeline** for Illustrator Copilot to answer how-to questions from retrieved product documentation to reduce hallucinations and improve answer accuracy.
- Filed **Colorization Patent** using multi-feature clustering pipeline to automatically **colorize complex mandala patterns**, evaluated via Adjusted Rand Index across 900+ images.
- Increased beta user engagement by 50% by building the **What's New Beta Feedback Panel** from scratch surfacing real user needs.
- Built **Hang Regression Tool** from scratch, detecting new hangs, regression breaks, and crashing modules across Win/Mac Intel/ARM platforms, directly improving stability metrics to 4.5% from 6%.
- Tech Stack :** Python, C++, MERN, FastAPI, LangChain, RAG, MCP

BOEING | ASSOCIATE SOFTWARE DEVELOPER | OCT'21 - JULY'22

- Migrated 10+ on-prem applications to Azure Pipelines, reducing deployment effort and improving operational reliability.
- Refactored HPUNIX scripts to Linux and redesign architecture to run applications on different OS configurations.

CLEVERTAP | SDE INTERN | APRIL - SEP'21 | REMOTE

- Worked to build custom Terraform providers for several applications, using the inbuilt User Management APIs in Golang. Completed AWS Cloud Practitioner under guidance of experienced mentors.

NOVOPAY SOLUTIONS | SDE INTERN | NOV'20 - APRIL'21 | REMOTE

- Worked on Lending Engine to categorize all retailers among several classes and revived Credit Rating based KhoslaLab's AI/ML Workbench. Built Invoices OCR Detection Model and Lending Website using MERN stack, fetching endpoints through Strapi CMS.

IIIT ALLAHABAD | RESEARCH INTERN | APR - AUG 2019 | PRAYAGRAJ

- Worked on converting dusk images to dawn images and vice versa, using the concept of pix2pix, based on Tensorflow and Pytorch frameworks, and trained CGAN and processed pictures in real-time.

GSSOC | SUPERVISOR | MAR - MAY'21 | REMOTE

- Mentored contributors in a 3-month open-source multilingual repository initiative by GirlScript Foundation.
